## Eligibility Criteria for BCA Course

The Bachelor of Computer Applications (BCA) is an undergraduate degree course in computer applications. It is a three-year degree course offered by many universities and colleges in India. The [eligibility criteria for BCA](#) course are as follows:

**Eligibility After 12th:** Students who have passed class 12th examinations in any stream (Science, Commerce or Arts) are eligible to pursue BCA course. Candidates must have studied Mathematics as a compulsory subject in class 12th. Some colleges may require a minimum percentage in the 12th class exam, usually around 50-60%.

**Education Qualification:** The minimum educational qualification for BCA course is a pass in Higher Secondary (10+2) or equivalent examination in any stream – Science, Commerce or Arts. Candidates should have Mathematics as a compulsory subject in 12th standard. Some institutes give preference to students with English and Computer Science as additional subjects in class 12th.

**College Wise Eligibility:** The eligibility criteria may vary for different colleges. Some reputed colleges may conduct entrance tests for BCA admission. However, most colleges admit students based on merit in the qualifying examination.

Some colleges may also specify a minimum percentage in the 12th class, usually 50-60% marks aggregate. Few colleges offer direct admission based on 12th class results while others may conduct counseling sessions or interviews before finalizing the candidates.

**Admission Process:** The [admission to BCA course](#) is usually based on the candidates' performance in the 12th class final examination and the entrance test (if applicable). Some colleges offer direct admission based on the 12th results while others may hold counseling sessions. The stepwise BCA admission process is:

1. Check the eligibility criteria for BCA course in the desired college.
2. Apply for BCA admission as per the schedule notified by the college. This is usually in the month of June after the 12th class results are announced.
3. Appear for the entrance exam if any, conducted by the college. Prepare well for the exam as it tests candidates' aptitude, logical reasoning and mathematics skills.
4. Check merit/rank and attend counseling session to choose from the list of colleges available. Report to the allotted college for admission.
