

# Electric Commercial Vehicle Market Global Forecast, Size to 2031aa

## Market Analysis and Size

[Global Electric Commercial Vehicle Market](#) was valued at USD 67.51 billion in 2021 and is expected to reach USD 1016.41 billion by 2029, registering a CAGR of 40.35% during the forecast period of 2022-2029. Battery Electric Vehicles (BEVs) account for the largest propulsion type segment in the respective market due to the government's availability of subsidies and support. In addition to the market insights such as market value, growth rate, market segments, geographical coverage, market players, and market scenario, the market report curated by the Data Bridge Market Research team also includes in-depth expert analysis, import/export analysis, pricing analysis, production consumption analysis, and pestle analysis.

## Market Definition

The electric commercial vehicle is an automobile which can be driven by one or more motors operated by electricity. These automobiles are not limited to only roads and rail vehicles but these automobiles are made for surface and underwater vessels, electric aircraft and electric spacecraft.

## Electric Vehicle Market Dynamics

This section deals with understanding the market drivers, advantages, opportunities, restraints and challenges. All of this is discussed in detail as below:

### Drivers

- Electric Vehicle (EV) Sales

The increase in the electric vehicle (EV) sales across the globe acts as one of the major factors driving the growth of electric commercial vehicle market. The consumer preference is rapidly inclining towards passenger and commercial electric vehicle (EV) due to the rising environmental consciousness.

- Digitalization of Vehicles

The rapid digitalization of vehicles accelerate the market growth. The need for achieving improved productivity, profitability at reduced costs and operational efficiency have a positive impact on the market. The surge in government funding on technological improvisation of these trucks and substantial infrastructure drives the market further.

## Report Scope and Market Segmentation

REPORT METRIC	DETAILS
Forecast Period	2022 to 2029
Base Year	2021
Forecast Period	2022 – 2029
Historic Years	2020 (Customizable to 2014 – 2019)
Quantitative Units	Revenue in USD Billion, Volumes in Units, Pricing in USD
Segments Covered	Propulsion (Battery Electric Vehicle, Hybrid Electric Vehicle and Plug-in Hybrid Electric Vehicle and Fuel Cell Electric Vehicle), Vehicle (Bus, Trucks, Pick-up Trucks and Van), Range (0-150 Miles, 151-250 Miles, 251-500 Miles, and 500 Miles & Above), Component (Electric Motor, EV Battery and Hydrogen Fuel Cell)
Countries Covered	U.S., Canada, Mexico, Brazil, Argentina, Rest of South America, Germany, Italy, U.K., France, Spain, Netherlands, Belgium, Switzerland, Turkey, Russia, Rest of Europe, Japan, China, India, South Korea, Australia, Singapore, Malaysia, Thailand, Indonesia, Philippines, Rest of Asia-Pacific, Saudi Arabia, U.A.E, South Africa, Egypt, Israel, Rest of Middle East and Africa
Market Players Covered	Ford Motor Company (US), General Motors (US), AUDI AG (Germany), Kia Motors Corporation (South Korea), Groupe Renault (France), Groupe PSA (France), SAIC Motor Corporation Limited (China), Tesla (US), Daimler AG (Germany), BMW AG (Germany), Hyundai Motor Company (South Korea), BYD Company Ltd. (China), Continental AG (Germany), TOYOTA MOTOR CORPORATION (Japan), Nissan Motor Co., LTD. (Japan), Volkswagen AG (Germany), AB Volvo (Sweden), Honda Motor Co., Ltd. (Japan), among others
Market Opportunities	<ul style="list-style-type: none"> <li>• High demand for electric vehicles in the automotive and transportation sectors</li> <li>• Increase in the electric vehicle (ev) sales across the globe</li> <li>• Increase in the production and sales of luxury cars</li> </ul>
