

Foundree Preschool & Daycare | Integrated Program

A preschool + day care

Our [integrated program](#) focuses on 21st century skills – the 4 Cs of communication, creativity, collaboration, and critical thinking beyond the foundation skills of numeracy and literacy that are developed in the schooling time.

This flagship program of Foundree combines holistic learning and care in one. You can choose from the half and full-day integrated program, starting from 8 am till 8 pm to keep your little champ happily engaged throughout. They get ample time to play independently in an unstructured fashion, in the areas of Making, Foundational Science, Outdoor play, Music & Movement.

They participate in various collaborative story building activity, let their creative juices flow through crafts like origami, enact their favourite characters or feed their curiosity with various riddles. They do all this and more with an aim to immerse themselves and learn in an experiential way, instead of being told or taught facts verbally.

Our little munchkins also develop strong socio-emotional skills such as Empathy, Independence and Self-Regulation right from the beginning, even through simplest of activities like eating during their mealtimes.
