

# Artificial Cornea and Corneal Implant Market Segmentations and Growth Analysis by 2028aa

## Introduction to Artificial Cornea and Corneal Implant Market

The artificial cornea and corneal implant market is an innovative segment within the healthcare industry, focusing on advanced solutions for individuals suffering from corneal blindness or severe [visual impairments](#). These technologies aim to restore vision and improve quality of life for patients.

Artificial Cornea and Corneal Implant Market will reach US\$ 696.18 million by 2028 from US\$ 421.86 million in 2021; it is expected to grow at a CAGR of 7.4% during 2021–2028.

## Market Segmentations

### By Type

- Human Cornea
- Artificial Cornea

### By Transplant Type

- Penetrating Keratoplasty
- Endothelial Keratoplasty

### By Disease Indication

- Fuchs

### By End User

- Hospitals
- Specialty Clinics and ASCs

## Current Market Trends

**Growing Demand:** The demand for artificial corneas is being driven by an increasing prevalence of corneal diseases and injuries. This trend is particularly noted in areas that have less availability of donor corneas.

**Technological Advancements:** Advances in material and surgical methods have improved the efficacy and safety of corneal implants. Research collaborations between the companies are coming up with future-generation implants.

**Regulatory Approvals:** With active clinical trials and regulatory approvals, new products are entering the market. More treatment options for patients are thus available.
