Hi Baisampayan,

I am writing to submit my web page assignment for your review. I have created a responsive and user-friendly web page that showcases my skills and experience as a web developer. The web page is hosted on GitHub Pages and can be accessed at this link: <https://github.com/Bhanu1132/bloghaveli> . Live preview can be accessed here : <https://bloghaveli.netlify.app/>

The web page is built with HTML, CSS and Bootstrap and follows the best practices of web development. It has a clear and consistent layout, a navigation menu, a header section with a glassmorphism effect as requested , a main section with Home, About-Us, Services, Internships and Contact-Us as quick actions.

The web page is also responsive and adapts to different screen sizes and devices. It uses media queries, flexbox and grid layouts to achieve this. It has appropriate color contrast, labels for form elements and keyboard navigation.

I hope you enjoy viewing my web page assignment and find it suitable for the position I applied for. I look forward to hearing from you soon.

Sincerely,
Bhanu Prakash
