

The 777-8 will join Boeing's freighter family

The 777-8 will join Boeing's freighter family, which currently includes the high-capacity 747-8, the long-range 777F, the versatile 767-300F and 767-300 converted freighters, and the standard-body 737-800 converted freighter. The 777-8 is expected to offer increased payload and long-range capabilities while reducing fuel burn and CO2 emissions.
