MEtaa

Virüs Payload Virüsü yani AUTORUN kullan?c? USB'yibilgisayar?na takd???nda virüsün otomatik olarak çal??aca??anlam?na gelir

Ve asl?nda ?ngilizce bir tutoriald?r en basit haliyle türkçeyeçevirdim

?unuda Söyliyeyim Tak?labilece?iniz Yerleri Çevirdim OnunD???ndakiler Anlamas? basit ifadeler

Requiements;

4444 ve 80 Portlar?n? Aç?caks?n?z!

1. ****sploit Framework Buradan ?ndirebilirsiniz =>http://****sploit.com

2. Operating System Windows or Linux (E?er Windows tanindireceksseniz windowsa ****sploit indirmeniz gerekecekyoutubede videolar? var)

1- Open your terminal

2- write cd /pentest/exploits/set

3- Run your Social Engineering Toolkit using ./set command

4- Choose number 3 Infectious Media Generator, and then forthe next step you can choose File-Format Exploits becausewe won't use straight executables exploit (3 Numaray? seçin ard?ndan File-Format Exploiti seçiceksiniz

5- Enter IP Address for Reverse Connection > fill in with yourIP Address(Attacker IP Address) (Kendi ip adresinizi Girin)

6- Select the file format exploit you want Actually you canchoose what exploit you want to use, but in this case I'musing the default one number 11 "Adobe PDF EXE Social Engineering) (11 Numaray? Öneririyorum Diyor)

7- If you have your own PDF it was better, maybe you canuse something that interest another people curious to open it,in this case I'm using my PDF Exams.pdf because I think it was really interesting file name (?lgi Çekici Bir ?sim KoyunKullan?c?n?n Dikkatini çekip açaca??)

8- There is an option that allows you to leave the pdf Blank

9- Now your Folder will be Generated

10- Go and hide autorun and template file (autorun dosyas?n? bir de templatenizi saklay?n)

11- after that put them in The Usb

12- Send it to the Victim [wait till he opens the pdf]

13- Start ****sploit listener [Multi/handler]
