

Is Termite Disturbing Tucson Residents? - Azpestaa

Termites are a common problem in Tucson, Arizona. Recent studies in the Tucson area show a staggering 12 to 18 termite colonies per acre. Homeowners should be aware of the warning signs of termite infestation, such as mud tubes, discarded wings, and damaged wood. It is important to protect homes from termites, as they can cause significant damage and cost homeowners hundreds of millions of dollars each year. Homeowners should avoid disturbing any dirt that has been treated with termite pesticide, as this can reduce the effectiveness of the treatment.

In summary, termites are a common pest in Tucson, and homeowners should take steps to protect their homes from infestation.

To prevent termite infestation in Tucson, homeowners can take the following steps:

Maintain a one-inch gap between soil and wood portions of the home.

This can be achieved by trimming back any vegetation that is touching the home and ensuring that the foundation is visible. Store firewood at least 20 feet away from the house and check it for pests before bringing it inside

Termites can easily infest firewood and then move on to the home. Fix any leaks or moisture problems in the home, as termites are attracted to damp wood.

This includes repairing leaky pipes, fixing roof leaks, and ensuring proper ventilation in crawl spaces. Have regular termite inspections performed by a licensed pest control professional

This can help detect any termite activity early on and prevent significant damage to the home.

Consider using termite-resistant building materials when constructing or renovating a home

These materials can include concrete, steel, and pressure-treated wood. Use [termite treatments tucson](#), such as baits or liquid termiticides, as a preventative measure.

These treatments can be applied by a licensed pest control professional and can help protect the home from termite infestation. By following these steps, homeowners can help prevent termite infestation and protect their homes from significant damage.
