

Navigating FDA's Updated Quality System Regulation (QSR) and ISO 13485 Consulting: What You Need to Know

Introduction: The Food and Drug Administration (FDA) recently announced significant updates to its Quality System Regulation (QSR), specifically focusing on aligning with international standards, particularly ISO 13485. These changes signal a major shift in the regulatory landscape for medical device manufacturers, necessitating a thorough understanding of the new requirements and their implications.
