So, we got the answers to some of these from theBigCommerce web designers at 1Digital? Agency(1DigitalAgency.com).

Can You Customize BigCommerce Without Code?
Yes, BigCommerce has an Intuitive Page Buildervisual editor that makes it possible to customizecertain page elements without knowing any coding.The site builder also allows users to create websitesfrom the ground up with pre-integrated paymentprocessors.

On the design side, the Page Builder makes it easierto adjust certain page elements and BigCommerceis configurable with a wide range of free andpremium themes.

What Code Does BigCommerce Use?
BigCommerce is compatible with Ruby, PHP, Java,and Python and also utilizes popularcode librarieslike HTML and CSS. BigCommerce web designersand developers withknowledge of these languagescan make extensive customizations toBigCommerce.

How Many API Calls Are Allowed?
That depends on the subscription, but for trial storesalong with Standard and Plus plans, 20,000 APIcalls are permitted per hour. For Pro plans, 60,000calls per hour are permitted. API calls are unlimitedfor Enterprise plans.
This is important because API calls are necessary toensure the fluid operability of allsystems integratedwith your BigCommerce store.

Does BigCommerce Integrate Easily with Apps and Tools?
Yes, BigCommerce has a relatively open API thatmakes most basic integrations simple; several compatible apps and tools can be integrated with just a few clicks. This is a great feature of the BigCommerce platform and makes it possible to create a unique store that offers a lot of functionality beyond the basics of the platform.

How Many Apps Are Available for BigCommerce?
BigCommerce offers a lot of functional tools to users and as a result, it is one of the most popular eCommerce platforms in the industry. As a result it supports a huge "BigCommerce ecosystem" that supports a lot of designers, developers, and marketers. This ecosystem has produced more than 1000 apps that are compatible with the platform.

Can BigCommerce Web Designers Code and Install Custom Apps?
This is more of a job for a BigCommerce development team than a design agency, but yes, designers and developers can code custom apps for BigCommerce and then integrate them.

Is BigCommerce Similar to WordPress?
In some ways, yes, but WordPress is open-source whereas BigCommerce is a Software-as-a-Service. BigCommerce, however, has a useful page builder and is compatible with a wide range of apps that make expanding the functionality and usability of the platform much easier.
