

You Can Stay At These See-Through Sleeping Capsules That Hang 400 Feet Above The Valley

The hotel is aptly named the Skylodge which is on the side of a 400 ft cliff in the Sacred Valley located in the beautiful country of Peru. There are only 3 rooms, and you have to hike up the cliff to reach your room, but oh what a beautiful view you would have! Sleeping under the stars in this glass encased bedroom would be simply breathtaking and waking up to an early morning sunrise on the side of a cliff would be a once in a lifetime experience! Welcome to the Natura Vive Skylodge.

These little glass pods on the side of the mountain are the rooms in the Natura Vive Skylodge.

Although the rooms of the Natura Vive Skylodge seem small, you have everything you need in the 24'x8' pod!
