

Best Cardiology Care in Chennai. Promed Hospital

Promed Hospital in Chennai stands out as a premier destination for cardiology care, providing a comprehensive range of services designed to meet the diverse needs of heart patients. With state-of-the-art facilities and a team of highly skilled professionals, Promed ensures top-notch cardiac care.

Advanced Diagnostic and Treatment Options

Promed Hospital offers cutting-edge diagnostic tools and treatment options, including:

Angiograms and Angioplasties: These procedures help diagnose and treat blocked arteries, improving blood flow to the heart.

Pacemaker Implantation:** For patients with irregular heartbeats, pacemakers are expertly implanted to regulate heart rhythms.

Electrocardiogram (ECG) and Echocardiogram (ECHO):** These tests provide detailed insights into the heart's electrical activity and structure.

Treadmill Test (TMT) and Holter Monitoring: These tests monitor heart performance under stress and over extended periods, ensuring comprehensive cardiac assessment.

State-of-the-Art Cath-Lab

The hospital is equipped with a modern Cath-Lab, facilitating minimally invasive procedures with precision and efficiency. This facility supports a range of interventional cardiology procedures, ensuring patients receive the best possible care with minimal downtime.

Expert Cardiologists

Leading the cardiology department is Dr. Arun Kalyanasundaram, a renowned cardiologist with extensive experience in treating complex heart conditions. His expertise is complemented by a team of dedicated cardiology specialists and support staff who provide personalized care to each patient.
