### Different kinds of goods and services

There are a lot of different kinds of things at Ganapathy Industries to meet the wants of businesses and industries.

- Polyethylene Terephthalate (PET) film is strong and bendable, and it is used a lot in factories, to insulate wires, and for packing.
- Plastic sheets: This group has many different types of bendable plastic sheets that can be used to make safe covers, pack things, and laminate.
- Plastic Film Made of Polyimide: This kind of film is used in the electronics and airplane industries because it can resist heat and electricity.
- BOPP Film: Biaxially oriented polypropylene films are great for packing because they are clear, strong, and don't soak up water.
- Covid Film: shields and packing choices made just for the COVID-19 outbreak with films that were made just for that purpose.
- Wire Wrap Films and Cable Wrap Films are made to keep wires and cords safe and warm in many types of businesses.
- Films that have been covered in lacquer to make them last longer and look better for art projects and gift packing.
- Coated Film: These films have extra layers on them that make them better at printing on and blocking light.
- Triplex paper is made up of several layers of paper that work well for strength and variety in packing.
