

What an incredible display of talent! The banana sculptures crafted by these young artists are truly inspiring.

What a fascinating image! It shows a young boy sitting on a small basket, with a large peacock made entirely out of bananas next to him. The peacock's tail feathers are created by arranging the bananas in a circular pattern, displaying both green and yellow bananas to form a vibrant and artistic design. The background appears to be a lush, tropical setting with more bananas and palm trees visible.
