

# Orbit Coatings - Advanced Industrial & Roof Coating Solutions in UAE

## ABOUT ORBIT COATINGS

ORBIT COATINGS is a leading Powder Coating & Heat heat-resistant paint Manufacturing Company in Dubai, backed with a fully equipped state-of-the-art plant and high-performance imported machinery. [ORBIT](#) has set its mission to provide whole solutions for powder and paint-based coatings. The Focus is to deliver quality powder and paint-based coatings for significant performance at a cost advantage & ensure maximum value to the Customers.

Dedicated to making a positive difference in the world, use our business to inspire, create eco-friendly solutions to make a mark on the world with consistent growth and development.

### 1. NanoCool Coat

[Nanocool coat](#) is a white, liquid-based coating which works on a triple action formula of: Reflection, Insulation, and Waterproofing. This makes it a very efficient, all-in-one solution to problems related to high temperature, insulation, waterproofing, heat reflection, and cooling.

### 2. Hydroshield

[Hydroshield](#) flexible, waterproof, and protective Coating. Elastomeric resin, which forms a membrane of protection that expands and contracts. Hydroshield waterproofs Flat roofs, pitched roofs, Parapet Walls, Terraces, etc., and provides a seamless, elastomeric, flexible roofing.

### 3. Nano Shield

[Nano Shield](#) is a hybrid acrylic-based coating that combines advanced nano carbon fiber technology with a dual-action formula of solar heat reflectiveness and waterproofing. This makes it highly effective at reducing roof temperatures and protecting surfaces from water damage, ensuring long-term durability.

### 4. Nano Prime

[Nano Prime](#) is an acrylic-based, single-component primer designed to enhance the adhesion of topcoat layers like HydroShield and NanoCool Coat. Its specialized formula creates a strong bond between the substrate and subsequent coatings, ensuring optimal performance and longevity

### 5. NanoSafe Activa
