

## NanoSafe Activa | Light-Activated Coating for Clean Air & Surfaces

[NanoSafe Activa](#) is an intelligent coating that harnesses the energy of light to decompose bacteria, viruses, fungi, algae, VOCs, and removes odors by degrading toxic organic pollutants to harmless Carbon Dioxide (CO<sub>2</sub>) and Water (H<sub>2</sub>O).

Our product uses light-activated TiO<sub>2</sub> that assists in eliminating bio-contaminants and creates an environment of fresh and clean air. Eliminates Bacteria, viruses, Odor, and lasts for years.

- Purifies Air
- Eliminates bacteria & viruses
- Eliminates mold
- Eliminates bad odour
- Eco-friendly
- Long-lasting
