What Is the Uber Eats Acceptance Rate?

The Uber Eats acceptance rate is simply the percentage of orders you accept. It's determined by looking at the total delivery requests you get and accept.

The acceptance rate on Uber Eats is similar to the DoorDash acceptance rate, as both platforms allow drivers to choose the orders they accept.

Whenever you log into the Uber Eats app to work, you receive delivery requests, depending on the order volume.

35 Deliveries since August 2022

For each delivery request, you can either accept or reject it. Each request shows you the order type, the distance, and your estimated earnings for the delivery.

When you accept an order, you increase your acceptance rate. Conversely, when you reject an order, your acceptance rate goes down.
